the stringing of the Jaworzno-Slawkow sector of a new high tension power line going from Jaworzno to Warsaw. The construction of the line in this area began in spring 1952 and, the work being done speedily, was finished in 1953. From the laborers working at the construction that the line will supply Warsaw with electric power from the new power plant "Jaworzno II" at Jaworzno. The line has six cables hanging on steel towers and runs from Jaworzno (Q 51/Y76) via Maczki and between Strzemieszycze and Slawkow in a northeastern direction.
